

We the People of Burkina Faso Living in Houston  
Houston Texas, 77057

June 14, 2014

The Honorable U.S. representative Sheila Lee Jackson  
Post Office Box 11867  
Columbia, S.C. 29211-1867

Dear Representative Jackson

We the People of Burkina Faso (West Africa) Living in  
Houston

Would like to bring to your attention a dire situation in our home country Burkina Faso, a young democracy which is slipping since few months away from the Sacro Saint principle of Democracy. As a matter of fact the current president has been in power for the last 27 year. As his term came to the end in November 201, his party against the will of the majority of the people want to modify our constitution in order to have him reelected indefinitely. Our country have some pressing issues that needed to be addressed immediately such as education, healthcare, unemployment, security, electricity & running water for the people and the list goes on ... the country cannot afford a crisis neither can we waste the so little resource at the disposal of our people. We do not want to allow a clan or group of people to hold the country hostage because of their egoistic ambition, sacrificing by then the people already burden by so many hurdle and hardship. We young on this generation would like to prioritize clean water for all versus the champagne for the few. We truly believe that the virtue of a true Democracy needs not to be proven sand that people should be free to elect their leader and decide for their future. We believe that change is a must for & in democracy. We believe that check and balance is what makes nations better off.

We would appreciate your help bringing the issues to who may help deter our leader in engaging our nation in this slippery slope with the consequences of uncertain future for our Democracy and our people.

Sincerely,
